About Me

I have an avid interest in genetics and evolution which led me to apply these approaches to studies of infectious diseases, such as *Plasmodium falciparum* malaria in my Masters of Science and PhD, to *P. vivax* malaria and various microbes in my current first post-doc position. I am also an active member of the R-Ladies+ Melbourne community and continue to contribute to Women in STEM based volunteering programs. Throughout my research projects, I have developed a deep interest in coding and have even generated this CV using R!

Current Position

Walter and Eliza Hall Institute of Medical Research (WEHI)

RESEARCH OFFICER

Melbourne, AU

2024-current

Education

University of Melbourne

DOCTOR OF PHILOSOPHY - MEDICINE, DENTISTRY AND HEALTH SCIENCES

Melbourne, AU

2020-24

University of Melbourne

MASTER OF SCIENCE (BIOSCIENCES)

Melbourne, AU

2018-19

University of Melbourne

BACHELOR OF SCIENCE

Melbourne, AU

2015-17

Publications

Shown are selected publications with first, second or third-author contributions.

Longitudinal analysis of the prevalence of minor *Plasmodium* spp. in the reservoir of asymptomatic infections through sequential interventions in Northern Sahelian Ghana

RIOS-TERAN, C. A., TIEDJE, K. E., BANGRE, O., DEED, S. L., ARGYROPOULOS, D. C., KORAM, K. A., ODURO, A. R., ANSAH, P. O. &

DAY, K. P DOI.ORG/1371/JOURNAL.PNTD.0014174

PLoS Neglected Tropical Diseases

2026

Navigating parasite antigen genetic diversity in the design of *Plasmodium vivax* serological exposure markers for malaria

BARENG, P., WU, K. W., TAKASHIMA, E., ARGYROPOULOS, D., SMITH, L., NAUNG, M., MAZHARI, R., SCHOFFER, K.,

KIERNAN-WALKER, N., ABRAHAM, A., LAMONT, M., MEHRA, S., LIM, P., SATTABONGKOT, J., MONTEIRO, W., LACERDA, M.,

HEALER, J., CHITNIS, C. E., THAM, W.-H., TSUBOI, T., MUELLER, I., BARRY, A. E. & LONGLEY, R. J.

DOI.ORG/10.1016/J.LANMIC.2025.101335

The Lancet Microbe

2026

Evaluating the Performance of Predicting *Plasmodium vivax* Infection Risk Using Serological Markers in Patients with *Plasmodium falciparum* Malaria

HAFIDZAH, M., DEGAGA, T. S., CHRISTIAN, M., ALAM, M. S., HOSSAIN, M. S., BAIRD, J. K., SUTANO, I., SMITH, L.,

ARGYROPOULOS, D., AMELIA, A. R., NOVIYANTI, R., PRICE, R. N., MUELLER, I., THRIEMER, K. & LONGLEY, R. J.

DOI.ORG/1093/INFDIS/JIAG164

Journal of Infectious Diseases

2026

Performance of SNP barcodes to determine genetic diversity and population structure of *Plasmodium falciparum* in Africa

ARGYROPOULOS, D. C., TAN, M. H., ADOBOR, C., MENSAH, B., LABBÉ, F., TIEDJE, K. E., KORAM, K. A., GHANSAH, A. & DAY, K. P.

DOI.ORG/3389/FGENE.2023.1071896

Frontiers in Genetics

2023

Comparison of molecular surveillance methods to assess changes in the population genetics of *Plasmodium falciparum* in high transmission

GHANSAH, A., TIEDJE, K. E., ARGYROPOULOS, D. C., ONWONA, C. O., DEED, S. L., LABBÉ, F., ODURO, A. R., KORAM, K. A.,

PASCUAL, M. & DAY, K. P. DOI.ORG/3389/FPARA.2023.1067966

Frontiers in Parasitology

2023

Teaching and Supervision

I have been actively involved in the fostering collaboration with researcher officers from Institut Pasteur (2024-current), Institut Pasteur du Cambodge (2024-current), Papua New Guinea Institute of Medical Research (2026), University of Chicago, USA (2021-2023) and the Noguchi Memorial Institute for Medical Research in Ghana (2021-2023) to develop skills in R, epidemiology and/or population genetics.

I have also had casual employment with the University of Melbourne to teach various subjects in Biology, Genetics and Evolution (2018-2021) and was a tutor employed by the Indigenous Tutorial Access Scheme (ITAS, 2019). I am currently working with WEHI to develop and give R-related workshops and courses, including BIOL90042: Coding and Data Analysis in Biomedicine which I am the Lead Tutor and will be a coordinator in 2027.

Conference Presentations

Shown are select conferences since 2024 where I have presented a poster and/or a talk.

- 2026 **posit::conf(2026)** (Scholarship): Conference to discuss latest developments in R and Python. [↗](#)
- 2026 **Climate Sensitive Infectious Diseases Network Regional Meeting** (Scholarship): Inaugural regional meeting for CSIDNet in Asia-Pacific. 15-minute talk. Part of SPARLE Team and aided R-based tutorial on infectious disease epidemiological modelling.
- 2026 **Computer Sciences Initiative Seminar** (Speaker): Conference inviting all Parkville Precinct members researching ID modelling
- 2025 **European Summer Program in Infectious Disease Analysis and Modelling (ESPIDAM)** (Poster): Summer program held for PhD students, post docs and public health scientists focussed on infectious disease modeling and epidemiology. Presented poster on machine learning algorithm implemented in PvSeroTAT.
- 2025 **Malaria Seminar** (Speaker): Organised by Malaria in Melbourne committee, with on bimonthly talks on latest malaria research. Presented 20 minute talk on PvSeroTAT work.
- 2024 **Genomic Epidemiology of Malaria** (Speaker/Poster): International forum for malaria scientists, clinicians, and public health professionals working at the interface of genome science and technology, epidemiology and statistical and population genetics [↗](#).
- 2024 **Molecular Approaches to Malaria Conference** (Poster): International conference on latest developments in malaria research [↗](#).

Awards and Funding

- 2026 **Best Speaker at the Computer Sciences Initiative Seminar** (Doherty Institute): Awarded A\$500 Prize for Best Talk
- 2026 **Opportunity Scholar for posit::conf(2026)** (Posit PBC): Awarded full scholarship to attend the posit::conf(2026) inclusive of travel, incidentals, hotel, conference and workshop registration [↗](#).
- 2025 **WEHI Postdoctoral Association Professional Development Award** (WEHI Postdoctoral Association (PDA)): Awarded A\$1,500 to attend ESPIDAM.
- 2025 **ACREME MASTER-MAP Travel and Training Award** (Australian Centre of Research Excellence in Malaria Elimination (ACREME)): Awarded A\$2,00 to attend ESPIDAM. [↗](#) "Write-up here"
- 2024 **Graduate Researcher Conference Support Program** (UoM): Awarded A\$1,500 to attend the Genetic Epidemiology of Malaria conference.
- 2024 **Major Bartlett University Scholarship** (UoM): Awarded A\$2,000 to attend the Genetic Epidemiology of Malaria conference [↗](#)
- 2019 **Leaders in Communities Award (LiCA)** (UoM): Awarded after completing over 20 hours of volunteer work during my Master of Science degree. [↗](#)
- 2019 **Stockholm International Youth Science Seminar Representative** (UoM): Selected as the only Australian student a to represent the UoM. 25 countries selected one student to attend Nobel Prize Week events. [↗](#)

WEHI Postdoctoral Association (PDA)

Communications Officer, Board
Member

WEHI POSTDOCTORAL ASSOCIATION (PDA)

2026

- Board member attending monthly 1-hour meetings discussing and advocating postdoctoral issues and events. Communications role focusses on generating a topical monthly newsletter showcasing grants, travel awardees, events, and other articles.

Women in STEM: Inspiring the Next Generation of Girls in STEM

Mentor

VESKI

2025

- Mentor for two students at a high school; I supervised and taught them about malaria and public health. They wrote a project about this work. 6x1-hour sessions with students, organised a half-day visit to WEHI and attended final ceremony with students.

R-Ladies Melbourne

President

R-LADIES MELBOURNE INC

2024-2026

- Key administrator and leader in organising events and liaising with speakers, committee and group. Organised committee meetings and events, executive decision maker, liased with collaborators and other non-for-profit organisations, liased with funding bodies (DiUS, Posit).

In2Science Mentoring

Mentor

IN2SCIENCE

2018-2019

- University volunteers mentor and help teach a metropolitan classroom or regional Victorian students online via Zoom. I have done both.
